

# RL37 -G RELIEF VALVE

**3/8" UP TO 414 BAR 6,000 PSI**

The RL37-G is a 3/8" ported relief valve. Designed for emergency relief applications, it may be used to protect systems up to 414 bar (6,000 psi).

The valve is a proportional metering style relief valve with soft seats enabling its use with gasses, and is approved as a safety accessory to category IV of the Pressure Equipment Directive.

- Approved to category IV of the Pressure Equipment Directive (2014/68/EU)
- Available preset via internal adjustment or with an external handwheel adjustment option
- Wire locking and tagging available on request
- Minimal leakage at 90% of set pressure
- Reseat within 20% of set pressure
- Repeatably within ±5% of set pressure
- Subsea variants available, contact us for advice
- Suitable for use with air, nitrogen and sweet natural gas.
- Suitable for many other media, contact us for advice
- Available in many other materials.

## Materials

Externally Exposed Parts: 316 stainless steel. The handwheel version contains other 300 series stainless steels.

Internally Wetted Parts: 316, 302 and 431 stainless steel and polyamide-imide. The standard valve is designed for use with air, nitrogen and sweet natural gas. Contact us for advice when use with other media is required.

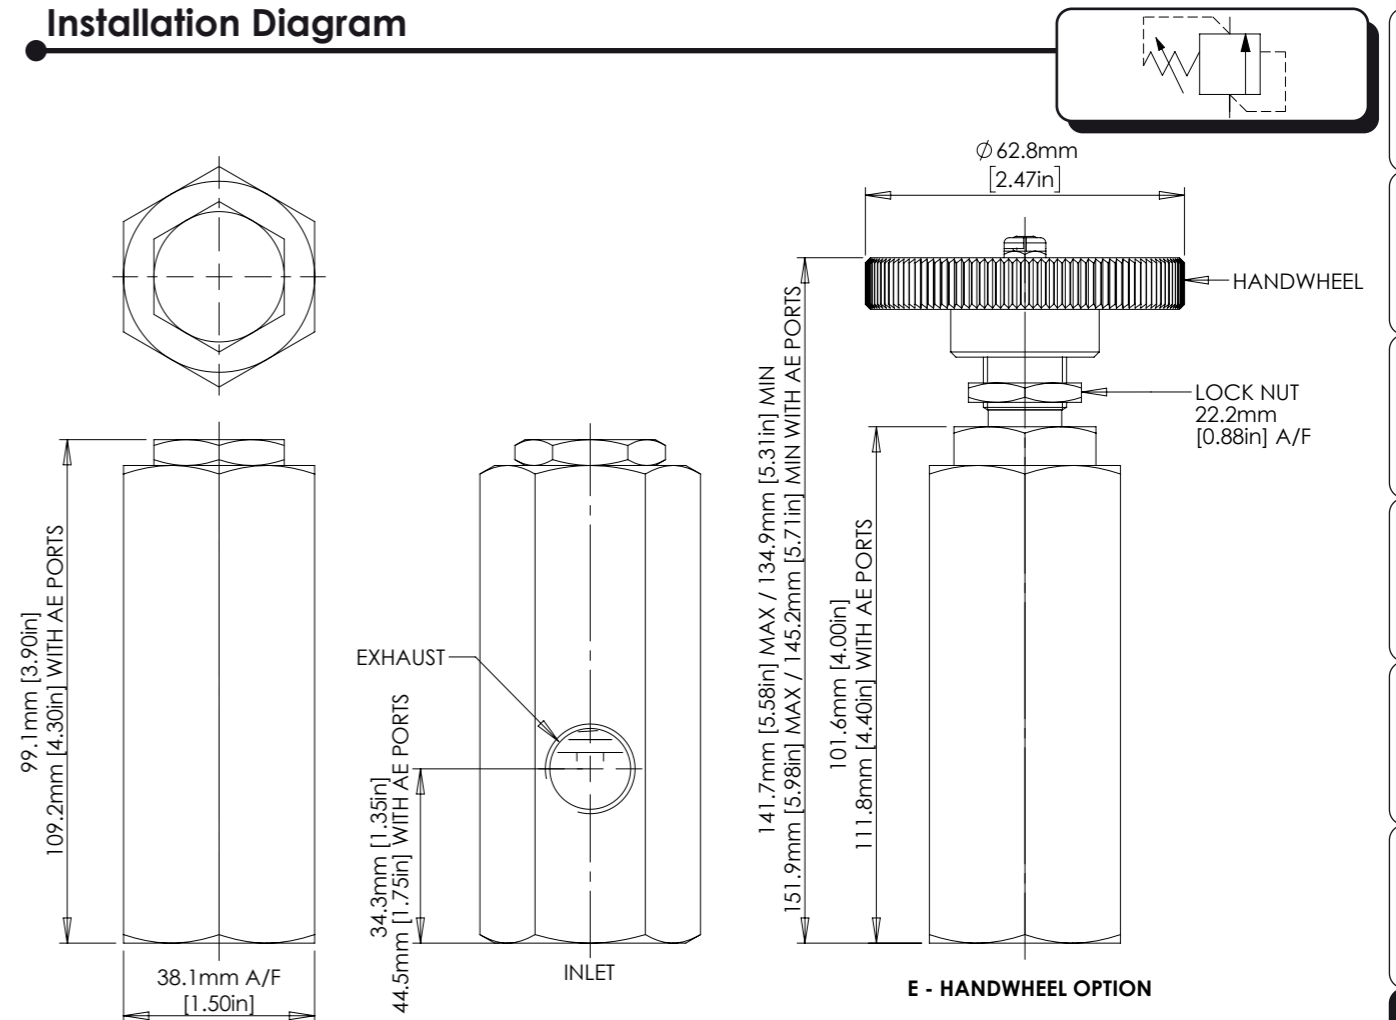

⚠ The standard valve has Viton® seals. Further seal options are available via the Product Selector. Compatibility with the working fluid at the operating temperature must be considered.

## Typical Performance

The kdr value may be used to calculate discharge capacity in accordance with ISO 4126. We recommend contacting us with system details to confirm suitability.
