## Introduction

## Applications

Mechanical pressure switches, also known as hydroelectric pressure monitors, are used to connect or disconnect electric circuits. A pressure switch can serve as a control unit and as an optical or acoustic monitor or indicator. Barksdale pressure switches are chiefly used in hydraulic systems for monitoring minimum pressures, such as protecting pumps from dry operation or as protection for oil lubrication systems. They can also be used for monitoring maximum pressures, such as automatic switch-off or warning device before a pressure relief valve reaches its limit pressure (fig. 1).
Another application for Barksdale pressure switches is the control of storage loading processes. After the storage capacity is reached (Pmax) the flow is stopped and the pump shuts down. When the storage pressure drops below a defined minimum value ( Pmin ), the pump is automatically started again. The switch hysteresis (Pmax - Pmin) can be freely selected with two pressure switches and one solenoid valve (fig. 2).
Within certain pressure ranges the storage process can be controlled with only one pressure switch, the KD1 compact pressure switch which Barksdale specifically designed for this application. The pressure set points Pmax and Pmin are factory set according to your requirements.

## Life Span and Accuracy

The life span and accuracy of pressure switches depend on the frequency and peaks of pressure changes, the number of load cycles and temperature influences. For proportional operation pressure switches the highest accuracy is achieved above $70 \%$, the longest life span below 30 \% of the performance range (fig. 3). The best combination of life span and accuracy is, however, between $30 \%$ and $70 \%$ of the performance range.

## Contact Materials

Barksdale pressure switches have silver contact micro switches. On request we also supply micro switches with gold-plated contacts. Gold-plated are almost exclusively used on micro switches that are only exposed to low electrical loads.
Fig. 4 depicts the standard values for the use of silver or gold-plated contacts. We are happy to assist you in the selection of the material best suited for your application.

## Summary:

The product of current and voltage should not exceed 0.12
VA. Recommended values: current should range at < 400 mA and voltage at $<30 \mathrm{~V}$. If operated on alternating current the above values are peak values.

Fig. 1

Fig. 2

Fig. 3

Fig. 4: Range of application of the various contact materials

## Introduction

## Contact Protection

The micro switches (MS) used in the pressure switches are normally suitable for both direct and alternating current operation. Inductive, capacitive and lamp loads may, however, considerably reduce the life span of a micro switch and, under extreme circumstances, even damage the contacts.

## Contact Protection

The micro switches (MS) used in the pressure switches are normally suitable for both direct and alternating current operation. Inductive, capacitive and lamp loads may, however, considerably reduce the life span of a micro switch and, under extreme circumstances, even damage the contacts.

## Capacitive Loads and Lamp Loads

Capacitive and lamp loads may be accompanied by very high discharge rates or start-up current rushes 15 times higher than the rated value. Under such circumstances, current limiters (for instance a protective resistance) should be used (fig. 5 and 6).

## Inductive Loads

High inductive peak loads during disconnection may considerably reduce the life span of a micro switch. The electric circuit can be protected by following the wiring diagram in figure 7 and 8 . The ratings of the individual elements (diode, varistor etc.) are determined by the corresponding application.

## Pulsation and Vibrations within the System?

## How to remedy the problem:

Pulsation and vibrations within the system can affect the function of the pressure switch. There are two different types of pressure switches: one type is sufficiently protected against pulsation and vibrations occurring during operation due to its solid design, the others are designed for precision adjustment which, consequently, makes them more sensitive to such influences. Please refer to the summary for compact pressure switch values regarding vibration resistance. To ensure proper functioning of the pressure switch, please observe the following recommendations:

## Mechanical Vibrations

Use rubber buffers between units and wall for wall mounted units.

## Pulsation/Vibration of the Medium

Use flexible hoses instead of pipes.
If this is technically not possible, place "pulsation restrictors" in front of the pressure switch, for example:

- helical pipes
- commercial pulsation snubbers
- diaphragm accumulators

As air pockets can enhance pulsation, please ensure that the hydraulic system is properly vented.

Fig. 5: Protection in case of capacitive loads R1 - Protection against start-up current rushes R2, R3 - Protection against high discharge currents

Fig. 6: Lamp load provided with resistance in parallel or series connection to switch

Fig. 7: Protection in case of continuous current and inductive load by recovery diode

Fig. 8: Protection in case of alternating current and inductive load by RC-link

## Metal Diaphragm

Metal diaphragm pressure switches with direct-acting pressure sensor and the snap-acting micro switch provide
very high accuracy and long life span.

## Applications

Machine and tool engineering,
Autoclave,
Pump control,
Refrigerant monitoring,
Petrochemical industry,
Process technology,
Filter monitoring,
Hydraulic power units

## Adjustment ranges

-1 ... 10.3 bar

## Summary of main components

| Item 1 | Fine-pitch screw allows precise set point <br> adjustment |
| :--- | :--- |
| Item 2 | Various housing types allow many <br> applications in normal and hazardous <br> installations; also Exi, Exd and UL |
| Item 3 | Large variety of micro switches with different <br> accuracy <br> and switching voltages |
| Item 4 | Wetted parts:DT: 1.4504/1.4564/14568*DPDT: <br> Aluminium/1.4504/1.4564/1.4568* <br> * $=(17.7-P H)$ |
| Item 5 | Pressure connections with NPT thread |
| Item 6 | Stainless steel diaphragm |
| Item 7 | Differential pressure switches:two bellows for <br> sealing without friction |

## Bourdon Tube

## Bourdon tube pressure switches

with direct-acting pressure sensor and the snap-acting micro switch provide
very high accuracy and long life span.

## Applications

Pump control,
Die-casting machines,
Press control,
Power plants,
Petrochemical industry,
Process technology

## Adjustment ranges

4.8 ... 950 bar

## Summary of main components

| Item 1 | Various housing types allow many <br> applications in normal and hazardous <br> installations; also Exi, Exd and UL |
| :--- | :--- |
| Item 2: | Large variety of micro switches with different <br> accuracy and switching voltages |
| Item 3: | Fine-pitch screw allows precise set point <br> adjustment |
| Item 4: | Pressure connections with NPT thread, |
| Item 5: | Wetted parts made of stainless steel |

## Approvals

For approvals and options please refer to the summary below.

## B-Series

## Compact

Pressure switches with a diaphragm or piston-type spring-loaded pressure element and snap-acting micro switch are characterized by their compact design.

## Applications

OEM applications,
Mobile and industrial hydraulic and pneumatic systems, Test bed and apparatus engineering, Heavy industry

## Adjustment ranges

Series 8000: 0.6... 600 bar
Series 9000: 10... 400 bar

## Summary of main components

- Option: factory set individual set points

| Item 1: | High-accuracy micro switch. Silver or gold- <br> plated contacts dependent on the application- <br> specific requirements. <br> Approvals: Exi |
| :--- | :--- |
| Item 2: | Housing parts made of stainless steel and <br> aluminium. |
| Item 3: | Elastomer diaphragm or low-friction piston <br> seal |
| Item 4 | Same housing design for diaphragm and <br> piston types allow many applications. |
| Item 5 | Various pressure ranges allow precise setting <br> between 0.6 and 600 bar or 10..400 bar <br> respectively. <br> Adjustment of set points though hexagon <br> socket (5mm) <br> Option: tactory set individual set points |

## Approvals

For approvals and options please refer to the summary below.

Series 8000

Serie 9000

## Compact

Pressure switches with a diaphragm or piston-type spring-loaded pressure element and snap-acting micro switch are characterized by their compact design.

## Applications

Mobile hydraulics,
Motor control,
Hydraulic clamping,
Building and agricultural machines,
Brake system control,
Hydraulic accumulator control

## Adjustment ranges

KLM: 1 ... 40 bar
KLK: 30 ... 400 bar
KD1: 30 ... 300 bar

## Summary of main components

| Item 1: | KD1 and KL series only available with <br> factory <br> setting, unauthorized adjustment excluded <br> Silver and gold-plated contacts for KD1 <br> series. <br> Approvals KLM/KLK: Exi |
| :--- | :--- |
| Item 2: | Same housing design for diaphragm and <br> piston types allow many applications. |
| Item 3: | Elastomer diaphragm or low-friction piston <br> seal |
| Item 4: | Housing parts made of stainless steel and <br> aluminium or of stainless steel and brass or <br> stainless steel. |
| Item 5: | KLM/KLK: High-accuracy micro switch. Silver <br> or gold-plated contacts dependent on the <br> application-specific requirements. <br> KD1: Adjustable hysteresis |

## Approvals

For approvals and options please refer to the summary below.

## KLM/KLK

KD1

## Diaphragm Seal Piston

Due to their design diaphragm seal piston pressure switches provide high accuracy, long life span and high proof pressure.

## Applications

Hydraulic/pneumatic systems, Shipbuilding applications,
Machine and tool engineering,
Dosing machines, plant engineering,
Sprinkler control

## Adjustment ranges

-1 ... 42 bar

## Summary of main components

| Item 1: | Large variety of micro switches with different <br> accuracy and switching voltages. |
| :--- | :--- |
| Item 2: | Wetted parts: <br> Diaphragm: NBR, FKM or PTFE (E-Series + <br> EPDM, CR) <br> Fitting: aluminium, polysulfone, (stainless <br> steel), or nickel-plated aluminium |
| Item 3: | Pressure connections with NPT or G threads |
| Item 4: | Fine-pitch screw allows precise set point <br> adjustment <br> Several pressure ranges allow following set <br> points: <br> E series: $-0.9 \ldots 34$ bar <br> P series: 0.1 ... 107 bar <br> MSPS series: 0.1 ... 6.8 bar |
| Item 5: | For many applications in normal and <br> hazardous installations; also Exi and <br> explosion proof housing acc. to CSA and UL. |
| Item 6: | Visual indication of set point for E1S and E1H |

## Special Functions

Type E1H can be equipped with manual reset for alarm functions with G-Micro switch option.
Type E1S and E1H are available with R-Micro switch for adjustable hysteresis (adjustable deadband).

## Approvals

For approvals and options please refer to the summary below.

## Overview

## Metal Diaphragm Pressure Switches

Mechanical single/dual pressure switch Repeatability $\pm 1.0$ \% at constant temperature

## Features

Metal diaphragm pressure switch
Wettet parts welded.
Direct action, no friction, high accuracy

## Adjustment ranges

0.005 ... 10.3 bar and
-0.006 ... -1 bar (Vacuum)

## Applications

Machine and tool engineering,
Autoclaves,
Pump control,
Refrigerant monitoring

## Technical Data

| Wetted parts: | Stainless steel $17-7 \mathrm{PH} / \mathrm{SS} 304$ |
| :--- | :--- |
| Repeatability: | $\pm 1 \%$ at constant temperature |
| Switching rate: | max. 20/min |
| Temperature range: | $-40^{\circ} \mathrm{C} \ldots+\mathbf{7 5}^{\circ} \mathrm{C}$ |
| Protection class: | IP00 |
| Housing: | Without housing for installation <br> in control panels |
| Process connection: | $1 / 4 "$ NPT female thread <br> Optional: 1/2" NPT female <br> thread (P2) |

| Electrical connection: | Lead wire PVC $1.5 \mathrm{~mm}^{2}$, <br> length appr. 450 mm |
| :--- | :--- |
| Electrical ratings and <br> hysteresis: | A large variety of micro switches <br> offers different electrical <br> ratings and hysteresis for many <br> applications. |
| Weight: | D1S-...: approx. 0.6 kg <br> D2S-...: approx. 0.7 kg |
| Set point adjustment: | Turn the adjustment screw <br> clockwise to decrease the set <br> point |
| Approval: | --- |

## Pressure Ranges

## Metal Diaphragm Pressure Switches

Mechanical single/dual pressure switch Repeatability $\pm 1.0$ \% at constant temperature

## Features

- Metal diaphragm pressure switch
- Wetted parts welded
- Direct acting, no friction, high accuracy
- Approvals: Ex ia, UL, CSA, marine, SIL2/3 (IEC 61508)

## Adjustment ranges

0.005 ... 10.3 bar and
-0.006 ... -1 bar (Vaccum)

## Applications

Machine and tool engineering,
Autoclaves, pump control,
Refrigerant monitoring, chemical industry
Ship building applications

## Technical Data

| Wetted parts: | Stainless steel 17-7PH / <br> SS304 |
| :--- | :--- |
| Repeatability: | $\pm 1 \%$ at constant temperature |
| Switching rate: | max. 20/min |
| Temperature range: | $-40^{\circ} \mathrm{C} . . .+75^{\circ} \mathrm{C}$ |
| Protection class: | IP65 |
| Housing: | Top part: aluminium powder <br> coated <br> bottom part: aluminium <br> anodized |
| Process connection: | $1 / 4 "$ NPT female thread <br> Optional: $1 / 2^{\prime \prime}$ NPT female <br> thread (P2) |
| Electrical connection: | WAGO terminal and cable <br> gland M20 x $1.5 ;$ <br> clamping range $\varnothing 5 ~ . . . ~$ |

| Electrical load capacity and <br> hysteresis: | Many micro switch versions <br> with different switching powers <br> and hysteresis are available <br> and make it possible to make <br> customized changes. |
| :--- | :--- |
| Weight: | D1T-...: approx. 1.0 kg <br> D2T-...: approx. 1.1 kg |
| Set point adjustment: | Turn the adjustment screw <br> clockwise to decrease the set <br> point |
| Intrinsically safe: | The switches are also available <br> for intrinsically safe <br> applications. In this case we <br> recommend gold contacts. Add <br> "Exi" in case of ordering. <br> Maximum rating according to <br> ATEX: <br> Umax = 28 V Imax = 50 mA |
| Approval: | --- |

## Bourdon Tube Press. Switches 〔区

Mechanical single/dual pressure switch
Repeatability $\pm 1.0$ \% at constant temperature

## Features

- Bourdon tube pressure switch
- All welded parts wetted
- Direct acting, no friction, high accuracy
- Approvals: Ex ia, Ex d, UL, CSA, SIL 2/3 (IEC 61508)

## Adjustment ranges

5.3 ... 496 bar

## Applications

Petrochemicals industry, Process technology, Shipbuilding technology, Alarm applications

## Technical Data

| Wetted parts: Process connection: Bourdon tube: | Stainless steel 1.4401 <br> Stainless steel 1.4401 |
| :---: | :---: |
| Repeatability: | $\pm 1 \%$ at constant temperature |
| Switching rate: | max. 20/min |
| Temperature range: | $-40^{\circ} \mathrm{C} . . .+75^{\circ} \mathrm{C}$ |
| Protection class: | IP65 |
| Housing: | Explosion proof housing, aluminum anodized and lacquered |
| Process connection: | 1/4" NPT female thread except ranges marked with*). These switches have proof pressures above 500 bar and are provided with high pressure thread with adapter G1/4' IG. |
| Electrical connection: | Internal terminal strip (0.5-2.5 $\mathrm{mm}^{2}$ ), approved cable gland has to be provided by the customer |
| Electrical rating and hysteresis: | Many micro switch versions with different switching powers and hysteresis are applicable and make it possible to make customized changes. |

| Weight: | B1X-...: approx. 3.9 kg <br> B2X-...: approx. 3.9 kg |
| :--- | :--- |
| Set point adjustment: | Turn the adjustment screw <br> clockwise to decrease the set <br> point. |
| Intrinsically safe: | line switches are designed for <br> intrinsically safe applications. In <br> this case we recommend gold <br> contacts. Please add "Exi" to your <br> ordering details when placing an <br> order. TTo comply with the <br> intrinsically safe approval following <br> max. ratings must not be <br> exceeded: <br> Umax = 28 V Imax = 50 mA |

## Diaphragm Seal Piston Press. Switches

Mechanical single switch
Repeatability $\pm 2.0$ \% at constant temperature

## Features

Diaphragm seal piston pressure switch, scale for setpoint reference

## Adjustment ranges

-0.28 ... -0.9 bar, vacuum
0.1 ... 34 bar, pressure

## Applications

Machine and tool engineering,
Dosing machines,
Plant engineering,
Lubricant monitoring

## Technical Data

| Wetted parts: <br> Diaphragm: <br> Process connection: | NBR <br> Optional: FKM, PTFE, EPDM, CR anodized aluminium Optional: brass, polysulfone, aluminium nickel-plated |
| :---: | :---: |

## Diaphragm Seal Piston Press. Switches

Mechanical single switch
Repeatability $\pm 2.0$ \% at constant temperature

## Features

Metal diaphragm pressure switch,
Set point can be adjusted with corresponding reference unit during operation

## Adjustment ranges

0.1 ... 6.8 bar

## Applications

Air conditioning,
Ventilation control,
Steam ejectors

## Technical Data

| Wetted parts: <br> Diaphragm <br> Process connection | NBR <br> Stainless steel 1.4401 |
| :--- | :--- |
| Repeatability: | $\pm 1 \%$ at constant temperature |
| Switching rate: | max. $20 /$ min $^{\circ} \mathrm{C}$ |

## Compact Pressure Switches

Series 8000 - mechanical pressure switches in diaphragm or piston design. The successors of the product lines XTM, XTK, X1T and 96200 have the additional advantage of very low and precise switching point settings.

## Features

- Modular construction
- Versatile
- High-quality materials
- 100\% functional test
- Long pressure spring
- Approvals: Ex ia, cULus, marine, SIL2 (IEC 61508)

## Adjustment ranges

0.6... 600 bar

## Applications

OEM applications,
Mobile- and industrial-hydraulics and pneumatics,
Test bed and apparatus engineering,
Heavy industry

## Technical Data

| Housing: ....Type KLK / KLM | Brass and stainless steel |

## Pressure Ranges

* Higher operating pressure (up to 150 bar) (with proof pressure 200 bar) on request. Please add to your order!

| Pressure range code | Adjustment range [bar] | Proof pressure [bar] | Max. operating pressure [bar] | Max. hysteresis [bar] |
| :---: | :---: | :---: | :---: | :---: |
|  | Increasing pressure | short term |  | end of range |
| KLM-006 | $1 \ldots 6$ | $80 / 200 *$ | 40* | 0.6 |
| KLM-025 | 5... 25 | 80 /200* | 40* | 2.6 |
| KLM-040 | $10 . . .40$ | 80 /200* | 40* | 3.8 |
| KLK-100 | $30 . . .100$ | 450 | 300 | 15 |
| KLK-300 | 60 ... 300 | 450 | 300 | 30 |
| KLK-400 | $150 . . .400$ | 600 | 400 | 60 |

## Dimensions (mm / inch)

## Electrical Ratings

| Micro <br> switch | Special features | Volt <br> DC | Ind. Load <br> A | Res. Load <br> A | Comments |
| :---: | :--- | :---: | :---: | :---: | :--- |
| $\mathbf{1}$ | Micro switch with silver contacts | 30 | 3.0 | 5.0 | More information on request. |
| 2 | Micro switch with gold-plated contacts | $\leq 30$ | -- | $\leq 0.4$ | (U x I = max. 0.12 VA) |

## Process Connection / Electrical Connection

| Process connection | Electrical connection | Diaphragm |
| :--- | :--- | :--- |
| (M1) M12 $\times 1,5$ male | (S1) Plug connector, 3-pin + E, EN 175301-803 C | KLK: ( ) NBR |
| (G1) G1/4 male | (K2) Silicone cable $3 \times 0.5 \mathrm{~mm}^{2} ; 600 \mathrm{~mm}$ long | KLM: (V) FKM |
|  |  | KLM: (N) CR |
|  |  | KLM: (E) EPDM |

## Options

| EXI | for intrinsically safe application |
| :--- | :--- |
| HP (KLM only) | operating pressure up to 150 bar |
| IP69K (K2 only) | for Heavy Duty application |

## Order Code

## Compact Piston Pressure Switches

Mechanical piston pressure switch
Repeatability $\pm 1.0$ \% typical

## Features

OEM pressure switch,
Factory setting only fully tamper proof.
Larger deadband for pump controlling

## Adjustment ranges

30 ... 300 bar

## Applications

Building and agricultural machines,
Brake system control,
Hydraulic accumulator control

## Technical Data

| Wetted parts: | NBR, PTFE <br> Brass, roller bearing steel |
| :--- | :--- |
| Repeatability: | $\pm 1 \%$ typical |
| Switching rate: | max. $60 / \mathrm{min}$ |
| Temperature range: | $-40^{\circ} \mathrm{C} \ldots+80^{\circ} \mathrm{C}$ |
| Protection class: <br> Silicone cable (K2): <br> Spade connector (A1): | IP67 <br> IP65 |
| Housing: | Compact housing made of <br> brass and stainless steel |

| Process connection: | M12 x 1.5 male thread <br> Other connections on request |
| :--- | :--- |
| Electrical connection: | Silicone cable (K2) <br> Spade connector DIN 46244 <br> (A1) |
| Electrical ratings and <br> hysteresis: | Hysteresis factory set, see <br> diagrams |
| Weight: | KD1-...: approx. 0.2 kg |
| Set point adjustment: | Factory set |
| Approval: | --- |

Pressure Ranges

| Pressure range code | Adjustment range <br> [bar] | Proof pressure [bar] | Max. operating <br> pressure [bar] | Max. hysteresis <br> [bar] |

## Electrical Connection

## Electrical connection

(K2) Silicone cable $3 \times 0.5 \mathrm{~mm} 2 ; 600 \mathrm{~mm}$ long
(A1) Spade connector 6,3 DIN 46244; green

## Options and accessories

(K1) EPD cable, 600 mm long
(A2) Spade connector 6,3 DIN 46244; blue

Notes

## Notes

# Specialists for monitoring and control of 

- Pressure
- Temperature
- Level
- Flow

Barksdale develops market-focused solutions for customers in the fluid power, transportation and industrial equipment markets focusing on applications that include:

Sensors \& Switches for Wind Turbines

Truck, trailer and bus suspensions

Shipbuilding

Sensors for Hydraulic Power Packs
